

THE LUXURY MAISONS L.RAPHAEL AND CHOPARD PRESENT:

The Limited Edition Diamond Powder Mask for Healthy, Glowing Skin and a Sparkle of Glamour

At the 2019 Cannes Film Festival, of which Chopard has been serving as official partner since 1998. L.RAPHAEL GENEVE will premier its exciting Diamond Powder Mask developed exclusively with Chopard, the red carpet jeweler. The new mask combines L.RAPHAEL's advanced technology skincare with diamond powder sourced from Chopard.

The limited edition Diamond Powder Mask delivers both immediate and long-term results by combining the exfoliating benefits of diamond powder with L.RAPHAEL's renowned Cure C formulation.

As the strongest material on earth, diamonds are an excellent exfoliating ingredient. When diamond powder is applied to the skin, it effectively removes dead skin cells allowing optimum penetration to nourish the skin with the powerful combination of anti-aging vitamins, minerals, oils and extracts found in L.RAPHAEL's age-defying Cure-C mask. Known as the red carpet jeweler, always keen to celebrate beauty and femininity, it was only natural for Chopard, after many years of collaboration with L.RAPHAEL, to be associated to the creation of the Diamond Powder Mask by supplying the powder of its most precious gems, diamonds.

The Diamond Powder Mask with the exclusive Cure-C formulation by L.RAPHAEL boosts the production of collagen, reduces wrinkles, minimizes the size of pores and provides potent anti-oxidant protection. Most importantly: it reduces UV induced cell & DNA damage.

The result - healthier, glowing skin with an exceptional brightening effect.
